

Instructions for use KTsuit

Do follows work before start our tools

A:Connect your KTsuit with USB cable to laptop

B:laptop or PC must connect to internet

Step1: go to www.ktmtool.com website donwload the software,install the package.

Step2:Check the SN where tie on your box backside , noticy : dont realase that SN to anyone , its a safe code for you ,dont let any third party or guys know that code or it easy let your tools lock.

Step3:Send that SN to email :info@ktmtool.com for active and link your tool to your email .(you tool will be lock if you dont send to active)

Step4 : run the ktsuit manager, and register it with your email , then input the sn active your account, don't close the ktsuitmanager before your run ktsuit ,always keep click the active button before you run the ktsuit software.

Step5: input that SN code to you login windows when you run KTsuit main software, it will ask you input that code ,then you software and tool will be online.
